SUMMARY

Motivated and detail-oriented Cybersecurity undergraduate with hands-on experience in software development, full stack development, cloud technologies, and security tooling. Adept at problem-solving, collaborating across technical and non-technical teams, and delivering reliable, efficient solutions. Eager to contribute technical skills and a strong work ethic to a dynamic organization while continuously growing as a professional.

EDUCATION

J.J. College of Engineering and Technology

Trichy, Tamil Nadu

B.E. in Computer Science and Engineering (Cyber Security)

2023 – 2027

- CGPA: 8.07

Oxford Matriculation Higher Secondary School

State Board

Class XII

2023

- Percentage: 82.5%

Oxford Matriculation Higher Secondary School

State Board

Class X

- Percentage: 75%

SKILLS

Languages: Python, Java, C/C++

Cyber Security: Ethical Hacking, Penetration Testing, Network Security, Threat Detection

AI / ML: Artificial Intelligence, Machine Learning, Deep Learning (CNN), OpenCV, TensorFlow, Data Science

DevOps & Cloud: Docker, GitHub Actions (CI/CD), Vercel, Render, REST APIs

Databases: MySQL, PostgreSQL

Soft Skills: Problem Solving, Communication (English, Tamil), Team Collaboration, Self Learning

PROJECTS

Expense Tracker Web Application | *Node.js, Express.js, PostgreSQL, JavaScript, Docker, Render, Vercel, GitHub Actions*

- Developed and deployed a full-stack Expense Tracker application with JWT authentication, analytics dashboard, category management, and CSV export functionality.
- Containerized the application using Docker for consistent and portable deployment across environments.
- Integrated a CI/CD pipeline using GitHub Actions to automate testing and deployment workflows.
- Hosted the backend on Render and frontend on Vercel, ensuring seamless cloud-based delivery.

Smart Traffic Sign Recognition using OpenCV | *Python, OpenCV, CNN, TensorFlow, Real-time Inference*

- Developed a CNN-based smart traffic sign recognition system using OpenCV that automatically detects and classifies road signs in real time.
- Implemented real-time webcam integration for live sign detection, enhancing detection efficiency and reliability for smart transportation.
- Achieved 95% classification accuracy on the test dataset using a fine-tuned convolutional neural network architecture.
- Applied image preprocessing techniques including resizing, normalization, and augmentation to improve model robustness.

CERTIFICATIONS

Google Cybersecurity Fundamentals – Coursera

Completed training on threat detection, risk management, and cybersecurity best practices.

Data Science Workshop Certification – IIT Chennai

Python Workshop Certification – IIT Chennai
